

## THE 2010 REVIEW CONFERENCE

## OSCE -ODIHR

### Working Session 1

ELECTIONS are without any election.

Human Rights Educational Centre [www.hrecb.org](http://www.hrecb.org)

**Belarus.**

The falsification. Forever Step by step.

The voting day at 19

December.

Lukashenko system power has been for 16 years. It is the experiment time, the time to find new falsification method , manipulation of popular opinion and Hebbels lie .

What is the electoral lie ? What is Human Rights violation at the election ?

Structural basis for the falsification.

1. Belarusian Election Administration is CEC – Central Election Commission and the president Administration. . It is Lukashenko’s Commission for manipulation.
2. First of all Central Election Commission print recommendations for territorial election commission. These recommendations are the priorities against the rule law.

### II. Election boundaries

The authorities use different criteria for the drawing of electoral distinct lines.

If oppositional candidates has good support by votes in “old “ election boundaries the authorities do new Election boundaries.

### III. Territorial election commission.

The authorities defines the composition of territorial election commission .

All members of commissions must support the activity of Lukashenko.

The opposition has 07 % (0,2 % ) representation only at territorial election commission .

Next position.

There are Lukashenko's election commission members .

They must be "election specialist", authorities supporting members — said the power.

It is very important Human Rights violation. Oppositional persons doesn't has same election experiment — said the power. Why ?

No-oppositional individuals work at election commission after 1994 year almost.

**But second side, authorities of Belarus doesn't to do election education.**

There are not any university or school for election education.

There is OSCE standard: " **Sufficient voter and civic education is need.**" It is not met in Belarus.

*IV. The power use all illegal methods to limit registration opposition candidates.*

There is very much large number of methods for repressing activity.

### ***The falsification. Step by step***

I. Voter Identification and registration.

Authorities change the quantity of voters. We see variable quantity of voters every election by Central Election Commission and territorial election commissions.

Please you see examples: The total quantity of voters:

**2006 --7 133 978**

1995 ---- 7.445 820 voters

1996 --- 7.346 397 voters

2000 ---- 7.328 100 voters

2001 ---- 7.218747 voters

2003 ---- 7.104 428 voters

**2004 – 6 307 395 voters** in a election day(90,28 % of all citizens) !?

2008 --- 7 016 711 all voters.

Dead persons are in voter identification lists .

1. Citizens are not in voter identification lists.
2. The total of voters in the list has been changed the election commission even between election rounds, within two weeks.
3. Election commissions made special address mistake for voter invitation to prevent voters from voting.

## **II. Preliminary voting . A general false method.**

We have the declaration of Central Election Commission about 30 percent

preliminary voting in each election. What is it? It is very drastic falsification and brutal manipulation.

There are not the proved reasons for same voting.

An observer doesn't have not opportunities for all-time observation.

## ***III. Observers***

1. Election commissions ( and the polling Station Officials ) register minimal observer quantity , there is illegal quote.
2. Election commissions can reject ( cancel) observer registration in election day. We have number examples for observers at 2001 - 2010 .
3. Election commissions makes not comfortable observer conditions for oppositional observers.

IV. *Election Day.*

1. Mistake of the address in voter invitation can exclude from participation more o thousands voters, as mean as one thousand at every station.
2. Voter Identification and registration at Election Day. Citizen can have two voter registrations and 2 ballots by election member.
3. One citizen has 2- 10 (and more) ballots. It is large experiment in military units.
4. Representatives of the authority throw illegal ballots in ballot box: ballot stuffing.
5. Observer doesn't have conditions for good observation electoral process. 5 -10 m out from a count table.
6. Chairman of polling commission do provocations for active observer and observer come out by police.

V. *Mobile ballot Boxes*

1. Mobile ballot boxes have very much quantity ballots. It is illegal ballots.

VI. *The Count. A general principle: **SILENCE***

Members of polling commissions mark ballots (Ballot Design) by their signatures, but there are cases for falsification signatures. Power has illegal ballots.

1. Commission members sorts voters ballots on candidate surnames but they do special mistakes. They wish to do mistakes on purpose to manipulate result.
2. Commission member give incorrect count results.
3. Commission member throws illegal ballots to other ballots by secret manner.
4. Commission member knows the result of **his part** ballots only.

VII. *Tabulation, Aggregation and Verification Process.*

It is final drastic stage for falsification electoral process.

It is general method today.

Pooling commissions have election result protocols with commission members signatures BUT **without election result!. Protocols are empty.**

A Chairman of regional election commission writes “result” of in this protocols in a building of territorial administration!!!.

“Need results” has been received from Central Election Commission by secret manner. **It is the death of the democracy.**

We expect that the VOTING of 19 October to be falsified and that it will be the life-term-presidency of A.Lukashenko as we have seen in former USSR republic Turkmenistan if Belarusian democrats will not have the support of A West civilization. Same Stalin repressions are every day....

Belarusian Nation goes to the death
