On May 19, 2005 the Parliament of Latvia ratified the *Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and their Destructor (Ottawa Convention)*. Anti-Personnel Mines are not produced or manufactured in Latvia. Latvia introduced a moratorium on the export and transit of anti-personnel mines in 1995. There are no time limits for this ban. The List of National Strategic Goods and Services include anti-personnel mines into the list of goods to be controlled additional to those included in the EU regulations as well as prohibit export and transit of anti-personnel mines.

National Legislation of the Republic of Latvia:

9. Does your country have any specific measures in place to provide assistance to victims?

There are no special programs for victims of anti-personnel landmines. However, there are general provisions for victims included in the Law on State Compensations to Victims of 2006. The Law provides that a person, who in accordance with the procedures specified by the Criminal Procedure Law has been recognized a victim, has the right to receive a state compensation regarding moral injury, physical suffering or financial loss as a result of an intentional criminal offence, if the criminal offence has been directed against the life or health of a person and death of the person has occurred or severe, moderate bodily injuries have been caused to the victim.

The Cabinet of Ministers Regulations No.279 of April 4, 2009 "Regarding the Procedures by Which Persons Receive Social Rehabilitation Services in Social Rehabilitation Institutions and Requirements for the Social Rehabilitation Services Providers" entitle persons with functional impairment, who comply with the criteria set out in the regulations, to receive state funded social rehabilitation services.
