WS 6: Fundamental freedoms, including freedom of peaceful assembly and association

19.09.2019 (1 min)

Right of Reply on the description by the Russian Federation of the nature of certain events in Estonia.

As majority of the European countries, Estonia suffered a lot during the WWII and under the totalitarian regimes during and after the war. The events that the Russian Federation referred to were private commemorative events of the victims of the battles and tragedies of the WWII, similar to those that have taken place in many countries who suffered from the disasters of the war.
