<b>GRAND TOTAL</b>	<b>Type EUR figure here</b>

  

In-kind contribution by the Implementing Partner (AZN)
Type AZN figure here

### **Budget Narrative**

The budget narrative adds explanation to the budget.

For example, with regard to the **salary budget line**, for each position relating to the project you should include the gross figure that takes into account tax; you should indicate for each position what percentage of time the person will spend working on the project; you should also provide a description of what the roles and responsibilities are for each position. In the event that a member of the proposed project team will also be working on another project or initiative, you should declare this.

### **Contingency Fund**

Because not all project expenditure can always be predicted at the outset of a project, it is acceptable to propose to a donor, the inclusion in the budget of an appropriate contingency fund for unforeseen expenditure. If the donor accepts the contingency fund in the budget, it will be important to receive written approval from the donor for the expenditure of this money before it is spent.
